

Plants of the Oregon Country Fair

2003 Revision by Bob Nisbet

This list is based on the plant list created by Cheshire Mayrsohn in the mid 1990's. Since that time land has been added to the fair, and additional species have been found. Many plant names have changed in conjunction with the [Oregon Flora Project](#). This list follows the newly published Vascular Plants of Lane County, Oregon: An Annotated Checklist, published by the [Emerald Chapter of the Native Plant Society of Oregon](#), 2002. A few species have been dropped from the list after cross-referencing the older list with the VPLC.

The current inventory includes 359 species of vascular plants, plus 8 mosses and lichens, for a total of 367 species. Of these 114 are introduced and 17 species of these are considered invasive. Many thanks to Charlene Simpson for her help identifying plants, advice, and final review. This list is also available in Excel format.
